

The objective is to increase efficiency and streamline processes

Press release

Aena grants Saba Parkings the overall management of car parks at 14 airports

- **The amount is 42.5 million with a 5 year grant period**
- **Additional services like car wash, oil change, minor repairs or the possibility of technical vehicle inspection will be offered**
- **It mainly emphasizes technological modernization and remote management service**

November 13th, 2013

Aena has awarded Saba Parkings the overall car park management of 14 airports in the amount of 42.5 million Euros for a five year grant period, with the possibility of two additional renewals. This way Aena intends to increase efficiency and achieve greater streamlining management processes, promoting quality and reducing associated cost.

The airports included in this list are: Alicante-Elche, Almería, Barcelona-El Prat, Girona-Costa Brava, Federico García Lorca Granada-Jaén, Ibiza, Málaga-Costa del Sol, Melilla, Menorca, Murcia-San Javier, Palma de Mallorca, Reus, Valencia and Zaragoza.

Aena thus implements a model of integrated management services including management and customer service, payment and economic control, maintenance, cleaning, surveillance and monitoring. Parallel to the operator management task, Aena manages the business directly taking responsibility for the development and definition of products, promotional actions, bookings and price management, and ultimately optimizing the income statement.

Among the innovations that gathers this process is the obligation of managers of satisfying the agreement on the quality of services provided.

It mainly emphasizes technological modernization and remote management service.

The new manager of the parking lots of these fourteen airports offer high value-added services in a complementary way to the parking lot itself, such as collection and drop off at the terminal, car wash, oil change and minor repairs or even the possibility to perform the technical vehicle inspection (ITV). All this will provide users with more convenience and a high level of satisfaction inherent in the requirement of quality standards to which the new management model proposed is the answer.

To Saba Parkings, "it is a natural operation of industry growth and perfect fit, as it takes advantage of operational synergies, expanding its territorial scope and remaining one of the leading operators in Spain."

In this regard, Saba Parkings, a company of Saba Infraestructuras Group, stated that "the award of this project means increasing by 25% the number of car parking spaces that the company currently manages, close to 130,000, reaching a total of 160,000 car park spaces. Meanwhile, the number of car parks increases by 31%, from 198 up to 260, with a presence in 87 cities in Spain, Italy, Portugal, Chile, France and Andorra. "
